Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 June 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claims 1-12 are pending. The Amendment filed 6/20/03, Paper No. 7, amended claims 1 and added claims 11-12.

Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Habib et al. (EP 832 643) in view of Simon (6,346,256).

The instant invention is directed toward an oil-in-water emulsion consisting essentially of a retinoid solubilized in a fluid oil and a polymeric emulsifier selected from the group consisting of an amphipathic block co-polymer, a polymer containing a hydrophilic backbone modified with hydrophobic groups, and mixtures thereof.

Habif et al. disclose the stabilization of an unstable retinoid in oil-in-water emulsions for skin care compositions. Exemplified is a composition comprising 3% butylene glycol-1,3 (humectant), stearyl alcohol (fluid oil alcohol), stearic acid (crystalline fatty acid), isostearyl palmitate (fluid oil), dimethicone (volatile silicone), linoleamide (retinoid booster) and 0.29% retinol. The compositions of the invention preferably have a half-lifetime of from 20-45 days at 50 C, and the fluid oil must be capable of solubilizing, at a storage temperature (25 C), the

required amount of retinol or esters thereof. See pg. 3, lines 35-pg. 4, line 57; pg. 5, lines 28-29; Example 1.

Simon teaches Pemulen TR2 (a polymer containing a hydrophilic backbone modified with hydrophobic groups) as stabilizing oil-in-water emulsions. See Col. 4, lines 4-18.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to add Pemulen TR2 to the oil-in-water emulsions of Habif et al. because of the expectation of achieving a highly stable emulsion.

While the reference does not teach the half-life of the retinoid in the composition of about 70 days at 50 C or the actual amount of grams of retinoid soluble per grams of oil, the composition of the combined references must have these properties, since the combined references teach the composition of the instant invention.

It is respectfully pointed out that for the purposes of searching for and applying prior art under 35 USC 102 and 103, absent a clear indication in the specification or claims of what the basic and novel characteristics actually are, "consisting essentially of" will be construed as equivalent to comprising. If an applicant contends that additional steps or material in the prior art are excluded by the recitation of "consisting essentially of", applicant has the burden of showing that the introduction of additional steps or components would materially change the characteristics of applicant's invention. See MPEP 2111.03.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
